

Animal Cardiology of Alabama
Ingrid M. Straeter-Knowlen, Dr. med. vet.
 Residency Trained in Cardiology
 2114 10th Avenue South; Birmingham, AL 35205

Date 9/15/25
 Dr. Clinic Cascade VC
 Name Theo Butler
 Breed Maine Coon Age 10/2024
 Gender M/i Weight 13.0 lbs

Diagnosis

1 – Normal heart today

Prognosis Good

Chief Complaint

No clinical signs – just a check for potential hypertrophic cardiomyopathy. Doing great.

Current Medications

None.

Examination

PE	<input checked="" type="checkbox"/>	ECG	<input type="checkbox"/>
Echo	<input checked="" type="checkbox"/>	Doppler/Color	<input checked="" type="checkbox"/>
Blood pressure	<input type="checkbox"/>	Radiographs	<input type="checkbox"/>
Blood work	<input type="checkbox"/>	Centesis	<input type="checkbox"/>

General Appearance	Excellent!
Respiratory Pattern	WNL; RR < 40
Color Mucous Membr.	Pink; CRT < 2 secs
Arterial Pulse Quality	Good
Jugular Pulse	No

Auscultation

Heart rate 162 BPM in regular rhythm most consistent with sinus rhythm. A heart murmur is not audible today.

Electrocardiogram

NE

Blood Pressure

NE

Echocardiographic Measurements

RVDd (mm)	
IVSd (mm)	4.1
LVDd (mm)	17.5
LVWd (mm)	4.2
IVSs (mm)	5.8
LVDs (mm)	8.7
LVWs (mm)	6.4
FS (%)	50
LA/Ao (Rishniw)	1.2
LA/Ao	1.4

Echocardiographic Interpretation

Structure

All of the measured parameters are within normal limits today. The septal bulge into the left ventricular outflow tract measures 0.55 cm (normal).

Function

Normal systolic function at 50%.

Doppler

Pressure across the pulmonary artery measures within normal limits today (4 mmHg).

Cardiac Assessment

Theo's heart and cardiac structure all measure within normal limits today. He's a sweet cat!

Recommendation and Treatment

No treatment is needed; a recheck is recommended at the discretion of the breeder (every 18 months is suggested).

Medication

None for heart.

Follow-up Examination

As needed with Animal Cardiology.
